 **HCK**®
SWITZERLAND

Is your body getting the nutrients it really needs?

Advanced medical laboratory analysis identifying your personalised prescription for optimised composition of up to 66 micronutrients based on your individual needs.

**Protect yourself
against premature
aging, improve your
health, and prevent
future disease**

Dull, dry, flaky skin? Hair loss? Brittle nails? Lack of energy or disrupted sleep?

These symptoms could be indicative of unidentified nutrient deficiencies.

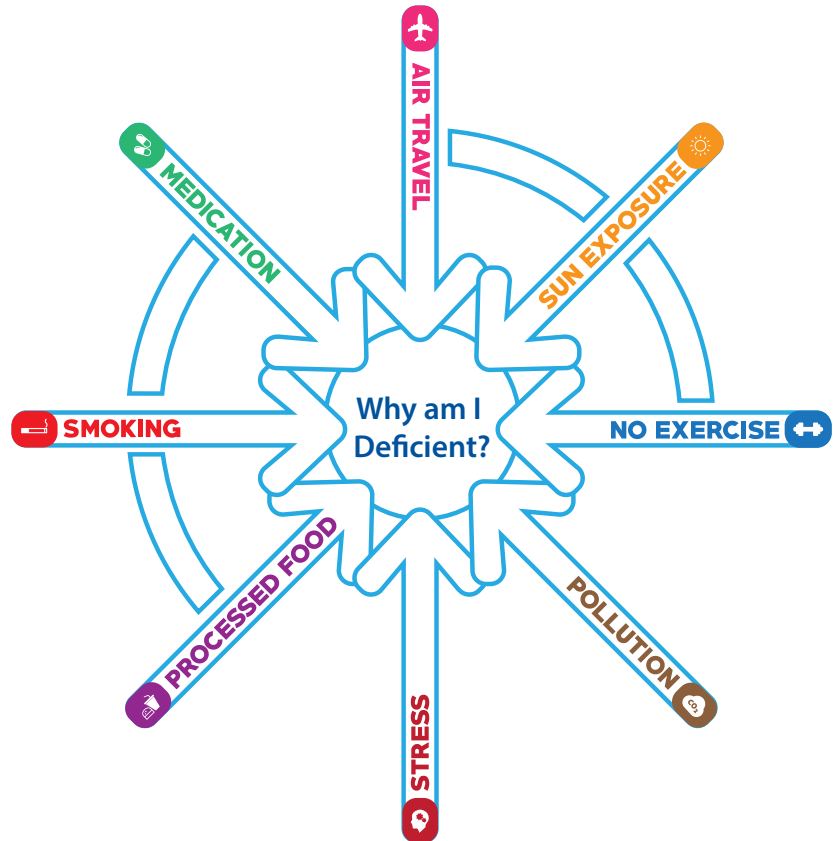

Our bodies need a continuous supply of vitamins, minerals, trace elements, plant extracts, dietary fibre, fatty & amino acids, as well as antioxidants to maintain good health and prevent disease.

We all have different nutrient requirements that are determined by factor such as our diet, levels of stress, how active we are, as well as our state of health.

Lacking specific micronutrients can affect your health in many ways.

Micronutrient deficiencies can affect how quickly you age, how well you feel, and may also lead to the development of chronic illnesses such as:

Premature Aging
Obesity
Sleep Disorder
Dementia and Memory Loss
Lack of Energy
Anxiety and Depression
Skin Disorders, Hair Loss, Brittle Nails
Poor Immune Function
Heart Disease
Hormone Imbalances
Male & Female Infertility
Degenerative Eye Problems
Cancer

The precise dose of specific micronutrients your body needs

Advanced laboratory analysis panels for more than 50 clinical biomarkers in our lab in Switzerland will generate your personalised micronutrient profile which may include any of the following:

 Iron	 Zeaxanthin	 Vitamin B3	 Vitamin D3	 L-5-HTP	 PABA	 Glucosamine Sulphate
 Magnesium	 Astaxanthin	 Vitamin B5	 Vitamin E	 L-Carnitine	 Inositol	 Creatine
